

Take Action More Broadly

- Join Sustainable Marblehead to support our work and get regular updates on our town's goals to reduce waste and pollution and reach net zero carbon emissions by 2040.
- Become a climate advocate - be informed and speak out for laws and policies that reduce fossil fuel use and support a healthy planet that can sustain us and future generations.
- Vote for elected officials who believe in science, understand the urgency of the climate crisis, and support efforts to address it.
- Consider green investing. You can invest in individual companies focused on renewable energy and other green technologies, green exchange-traded funds, and mutual funds that hold green stocks.
